Titles

A

Analysis of Hydrogen Fluoride Release at Texas City 213
Application of the Flammability Diagram for Evaluation of Fire and Explosion Hazards of Flammable Vapors 176
Assignment of Safety Systems Addressing Workplace Hazards, The 233

B
Burst Resistant Ribbon Wound Pressure Vessels for Ammonia Plants 98

C
Case Studies of Incidents in Runaway Reactions and Emergency Relief 259

D
Detailed Reaction Study of Phosphorous Trichloride and Water, A 49
Determination, Prevention and Mitigation of Potential Hazards Due to the Handling of Powders During Transportation, Charging, Discharging and Storage 74
Dust Explosion Mitigation Using Q-Rohr and Exkop .184

E
Effects of Valve Wheel Size, Operation Position and In-Line Pressures on Required Torque for Gate Valves, The 263
Emergency Planning: Critical Evaluation of a Proposed AGELs for Ammonia 134
Experience With Non-Destructive Testing of Static Equipment in Ammonia Plants at DSM 200

F
Fire Tests of Rack Storage of Water Miscible Liquids in Plastic Containers 149
Flammability Hazards of Lower Aliphatic Aldehydes at Elevated Pressure and Temperature 138

I
Improving the Effect of Atmospheric Stability Class for Dispersion Modelling 1
Influence of the Geometry of the Hot Surface on the Autoignition of Vapor/Air Mixtures: Some Experimental and Theoretical Results, The 68
Integrating Hazard Analysis into the Implementation of Advanced Process Control 104
Investigation of an Explosion and Flash Fire in a Fixed Bed Reactor 127
Investigation of a Steam Explosion in a Petroleum Product Storage Tank 171

K
K_G: New Data and Analysis 9

M
Making RMP Hazard Assessment Meaningful 238
Making Safey Second Nature 196
Measures Taken to Ensure Safe Operation of an Ammonia Storage Tank 288
Model for the Calculation and the Verification of Closed Cup Flash Points for Multicomponent Mixtures, A 86
Models for Domino Effect Analysis in Chemical Process Industries 107
Multivariate Hazard Identification and Ranking System 157

N
NFPA 30: An Update and a Look into the Future 23

P
Peroxide Drum Explosion and Fire 225
Pressure Relief System Documentation: Equipment Based Relational Database is Key to OSHA 1910.119 Compliance 39
Properties of Simulated Gas Explosions of Interest to the Structural Design Process 278

R
Reactive System Screening Tool (RSST): An Easy, Inexpensive Approach to the DIERS Procedure, The 190
Recent Developments in the Baker-Strehlow VCE Analysis Methodology 297

Reactivity and Ignition Characteristics of Silane/Air Mixtures 243
Risk Based Prioritization of Maintenance Repair Work 32
RMP Hazard Assessment for Compliance with EPA's Risk Management Program Regulation: OxyChem's Experience 272

S
Safety, Health and Loss Prevention in the AIChE 83
Safety Surveys - Looking at Key Activities in Depth. . .20
Short Communication: Estimating the Minimum Ignition Energy of Hybrid Mixtures 124
Suppression of Class A Fires With HFC-227ea 209

Subjects

A
Advanced process control, implementation of 104
Aliphatic aldehydes, flammability hazards of 138
Acute Exposure Guideline Levels (AGELS) 134
Ammonia
  evaluation of AGELS for 134
  plants
    pressure vessels for 98
    testing of static equipment in 200
  storage tank 288
Atmospheric stability class, effect of 1

B
Baker-Strehlow VCE anslysi methodology 297
Burst resistant pressure vessels 98

C
Case studies of incidents 259
Compliance database 39

D
Dust explosion mitigation. 184

E
Emergency
  relief, studies of incidents in 259
  planning, evaluation of AGELs for ammonia 134
Explosion(s)
  and flash fire, investigation of 127
  hazards, evaluation of 176
  mitigation 184
  peroxide drum 225
  simulated gas 278
  steam 171

F
Fire(s)
  and explosion hazards, evaluation of 176
  class A, suppression of 209
  flash fire and explosion, investigation of 127
  peroxide drum explosion and 225
  tests of storage of water miscible liquids 149
Fixed bed
Flammable vapors 176
Flammability diagram, application of 176
Flash points, closed cup 86
Fluoride release, hydrogen 213

H
Hazard
  analysis 104
  assessment for compliance 32
  flammability 138
  mitigation of potential 74
  multivariate identification and ranking system 157
  RMP assessment 238
  workplace 233
Hazardous wastes, transportation of 61
Hybrid mixtures, minimum ignition energy of 124
Hydrogen fluoride release, analysis of 213

K
K_G value, in gases 9

L
Loss prevention 83
Lower aliphatic aldehydes, flammability hazards of . .138

M
Mixtures
  hybrid 124
  multicomponent 86

P
Peroxide drum explosion and fire 225
Plants, ammonia. 98, 200
Phosphorous Trichloride, study of 49
Powders, handling during transportation. 74
Pressure
  relief system documentation 39
  vessels for ammonia plants 98
Process control, safety and performance 43

R
Reactor, fixed bed 127
Reactive system screening tool (RSST) 190
Ribbon wound pressure vessels 98
Risk

based prioritization of repair work 32
management program 272
RMP (EPA's risk management program) 272
Runaway reactions, incidents in 259

S

Safety 196
health and loss prevention. 83
process control 43
surveys 20
systems 233, 219
Silane/Air mixtures 243
Solids handling systems 16
Static equipment, non-destructive testing of 200
Storage
ammonia tank, safe operation of 288
handling of powders during. 74
tank 171

T

Tanks
petroleum product storage 171
Team situation awareness 43
Thematic approach to system safety 219
Transportation of hazardous wastes 61

V

Valves
gate, pressures on required torque for 263
Valve wheel size, effects of 263
Vapor/air mixtures, autoignition of 68
Vent access 16

W

Wastes, hazardous 61
Water, study of phosphorous trichloride and. 49
Workplace hazards, addressing 233

Statement of Ownership, Management, and Circulation (required by 39 U.S.C. 3685) of July 1, 1998, for *Process Safety Progress* Publication No. 689-410, issued quarterly for an annual subscription price of $210 from 3 Park Avenue, New York, NY 10016-5901, which is the location of its publication and business offices. The name and address of the Publisher, Editor, and Managing Editor are: Publisher, Stephen R. Smith, 3 Park Avenue, New York, N.Y. 10016-5901; Editor, T.A. Ventrone, 3 Park Avenue, New York, N.Y. 10016-5901; Managing Editor, Maura Mullen, 3 Park Avenue, New York, N.Y. 10016-5901. The owner is: American Institute of Chemical Engineers, 3 Park Avenue, New York, N.Y. 10016-5901. The known bondholders, mortgagees, and other security holders owning or holding one percent or more of the total amount of bonds, mortgages, or other securities are: None. The purpose, function, and nonprofit status of this organization, and the exempt status for federal income tax purpose have not changed during the preceding 12 months. The following figures describe the nature and extent of *Process Safety Progress*' circulation. In each category the first number (in italics) is the average number of copies of each issue during the preceding 12 months. The number next to it, within parentheses ( ), is the actual number of copies of the single issue published nearest to the filing date. Total number of copies printed (net press run), *2,625* (2,500). Paid circulation: 1. Sales through dealers and carriers, street vendors, and counter sales: None; 2. Mail subscription: *2,128* (2,064). Total paid circulation: *2,128* (2,064). Free distribution by mail carrier, or other means; samples, complimentary, and other free copies, *15* (15). Total distribution *2,143* (2,079). Copies not distributed: 1. Office use, left over, unaccounted, spoiled after printing: *482* (421); 2. Returns from news agents: None. Total: *2,625* (2,500). I certify that the statements made by me are correct and complete.
Stephen R. Smith, Senior Director, Publications.
